TRAVEL HEALTH?

Over 90 million trips abroad are made from the UK every year¹, but **around 60% of travellers** seek no health advice before travelling². This means many travellers are potentially putting their health at risk.

POTENTIAL TRAVEL HEALTH RISKS

When preparing for your travels, there are many things to consider, however your health should always be high on the list of priorities.

Depending on your destination and the activities you plan to engage in, travelling can increase your risk of developing a variety of health problems. Ranging from mild and inconvenient to severe and life-threatening, these diseases include but are not limited to:

Mosquitoes, ticks & other biting insects

- Chikungunya
- Dengue Fever
- Japanese Encephalitis
- Lyme Disease
- Malaria
- Tick-borne Encephalitis
- Yellow Fever
- Zika Virus

Person-to-person

- Diphtheria
- Hepatitis A & B
- Measles
- Meningitis
- Pneumococcal disease
- Polio
- Tuberculosis
- Whooping Cough

Food & water

- Cholera
- Hepatitis A
- Travellers' Diarrhoea
- Typhoid

Animals & other infection routes

- Rabies
- Tetanus

Other risks & considerations:

- Sunburn
- Heat exhaustion & sunstroke
- Dehydration
- Travel & altitude sickness
- Deep vein thrombosis
- Sexual health
- Managing your medication
- Personal safety

TRAVELLERS' CHALLENGES

- 1 Many travellers do not think about health advice as part of their holiday and travel planning
- 2 Travel health can be complicated and sources of advice fragmented, leaving travellers uninformed and under-prepared
- 3 As a result, travellers often leave it too late to seek professional travel health advice and protection, or do not seek advice at all
- 4 Travellers are unclear on where best to seek professional advice and can't always get a convenient appointment
- 5 Despite having made a significant investment in the cost of their holiday, people perceive travel health as expensive compared to the risk of travelling unprotected

HELP PROTECT YOURSELF

No matter whether you are travelling abroad on holiday, visiting family or friends or travelling for business, you should consider the potential health-related risks you may be exposed to.

It is recommended that you research the countries you are travelling to and seek professional travel health advice from either your nearest travel health clinic, or a pharmacist who offers a comprehensive travel health service. These clinics will help you to understand the risks and take the appropriate preventative measures.

If you need vaccinations for your travels, you may need to allow time for more than one dose. For this reason, it is recommended that you seek comprehensive travel health advice **at least 6 weeks before travelling.**

Useful information for discussing travel health needs with your healthcare professional

- Destination(s)
- Duration of stay
- Planned / intended activities
- Recent destinations and vaccinations received
- Pre-existing medical conditions
- Current medications

Visit www.bewareofthebugs.com to find your nearest convenient pharmacy or specialist travel health clinic for a risk assessment before your trip.
